## ADAPT™ PARTNER PROGRAM

### Adapt™ Program

**Adapt to the future of eClinical, join the cloud...**

The use of cloud computing to share information is penetrating every area of our business and personal lives. From online banking and travel, to Facebook and LinkedIn, cloud computing is the new standard. Clinical trials technology has lagged behind most other major industries when it comes to using cutting edge technology. With cloud computing we've hit a tipping point that has the potential to revolutionize the way we share information for clinical research.

It is PharmaPros' mission to create an eClinical cloud to help make this a reality. We believe the sharing of information across disparate systems should be the norm, not the exception for a select few.

PharmaPros' award winning **Dataflow Manager** product is pioneering cloud computing in clinical trials with the most flexible, and scalable methods of connectivity available in the industry. We've developed technology that can enable any technology to join our cloud, with zero R&D, and no impact on those systems.

With the **Adapt Program**, we are inviting eClinical technologies of all types to get connected through our Adapt Cloud, with no-commitment, and no formal partnership. Technology partnerships can be daunting, and few fulfill their initial promise. So rather than "waiting for a client opportunity," negotiating partnership agreements, and devoting resources to these activities, we've developed a program that enables members to add value to their technology, and bring that to their clients independently.

With data feeds from CROs, labs, and imaging centers, and operational data from data capture technologies, we envision an eClinical app exchange to enable global workflow and collaboration for clinical research.

Join us in creating a new paradigm of technology agnostic solutions.

## HOW TO ADAPT YOUR TECHNOLOGY

If you are a technology vendor, central or specialty lab, imaging center, or investigator site, your systems can be connected.

### **There is no charge to become connected...**

For those technologies with published web-services API's: PharmaPros will review the API specifications, and build a reusable adapter for your technology, at no cost.

For technologies that do not have web-services API's, PharmaPros is offering the configuration of its Enterprise Adapter™ to enable web services, at no cost.

### **The benefits to Adapt™ Program members include:**

- ▶ Member's eClinical technology is cloud-enabled.
- ▶ PharmaPros will promote member technologies through our DFM OnDemand solution. This includes profile information on our web site, sales collateral, and other marketing vehicles, as well as direct referrals as an OnDemand technology.
- ▶ Dataflow Manager capabilities can be bundled with Member technologies on a per study basis, to quickly extend capabilities.
