DFM ADAPT SOLUTION

INNOVATIVE SOLUTION BUNDLES

DFM Adapt solutions offer flexible packages designed to provide CROs and Technology Vendors with some of Dataflow Manager's innovative capabilities through a flexible, study-based model.

DFM SITE

Dataflow Manager's real-time trial management capabilities provide a level of automation unmatched in the industry. Now, these features are available as a stand-alone solution. DFM Site provides site management, **dynamic monitoring** and document management capabilities as an integrated extension of the customer's EDC application.

DFM STUDY

Dataflow Manager's powerful tracking and reporting functionalities are now available as a bundled solution for EDC applications. This automated solution enables global data tracking capabilities and provides the most up-to-date, accurate study information possible. Users can drill-down into the dynamic statuses of the study, sites, subjects, forms, and data sources, gaining unparalleled trial visibility through one interface.
