

# HARNESS THE POWER OF THE CLOUD

**DFM Enterprise™**

Create an operational eClinical cloud  
to drive business intelligence across  
your enterprise

## DATA SHEET

# DFM ENTERPRISE

### Delivering unified business intelligence across any eClinical enterprise

DFM Enterprise is a solution designed to solve the challenge of delivering unified business intelligence across complex eClinical enterprises. Using Enterprise Adapter™, in-house eClinical technologies are enabled to share key operational information with Dataflow Manager. With access to the operational information across disparate systems, this solution empowers organizations with real-time, actionable information.

From executives to study level managers, DFM Enterprise provides the business analytics and data driven intelligence necessary for success in managing the business of clinical trials. Enterprise, program, and study level reporting, automation of best practices, sponsor team and vendor collaboration are available through one central interface.

### SOLUTION BENEFITS

- Creates an eClinical cloud using existing client technologies
- Leverages legacy systems without additional investments
- Provides one central interface for global business intelligence
- Zero impact to source systems
- Delivered in 6-8 weeks

### MORE ABOUT ENTERPRISE ADAPTER

Dataflow Manager™ uses web services to facilitate data retrieval from distributed eClinical systems. For those systems that do not have web service APIs or are installed behind the enterprise firewall, PharmaPros developed the Enterprise Adapter. It provides a configurable and secure web service API that is installed within the customer's enterprise, and operates as part of the Dataflow Manager™ application.

- Enables Web-Services data sharing with any clinical system
- A Secure, proven, and scalable solution for data sharing
